

Genealogy 201

Fall 2012

Six classes will be offered in October and November. You can sign up for all of them or just the class(s) you are interested in. Classes will be conducted as interactive workshops so be prepared to participate. The November classes will be on problem solving techniques based on student presented problems. Students will be asked to define a problem they would like to solve. These should be mailed in with your registration and will be reviewed by the instructors. For each class 3 or 4 specific problems will be presented with techniques to use to resolve them.

All classes will be held on Thursdays in the Coyote Room starting at 1:00 pm and ending at 3:00 pm. These classes are only open to current club members and there is no fee to participate. Class size is limited to 20 students.

October 11: Wills and Probates

This class will give a more in depth look at the process of probating a will, where to look for the records and what type of information can be found in these records.

October 18: Using the U.S. Census

This class will take a closer look at the 1940 and 1930 U.S. Census and show how to use the census information and why you want to start with the most recent census and go back in time to trace your ancestors.

October 25: On the Internet; Family Search, Fold 3 and others

This class will look at the Family Search website, digital records available online, and how to use the "card catalogue". We will also look at Fold 3 for military and other records on their site. Other sites will also be shown.

November 8, 15, and 29: Problem solving techniques.

Students signing up for any of these classes are requested to complete the next page. Several student problems will be presented in each class as a way of demonstrating various problem solving techniques.
